

LET MIURA ADDRESS PROBLEMS BEFORE THEY START WITH OUR WATER TREATMENT PROGRAMS

Reduce downtime and costly repairs with the winning combination of Water Softening, Chemicals, and our Preventative Maintenance Package.

Repairs can be time-consuming and are costly, not to mention the costs associated with loss of production due to the boiler being down for an extended period of time. Regular testing, both at your site and at our lab keeps you ahead of any issues that might arise.

We offer cross-Canada water testing services by mail. We provide the bottles and instructions for you to collect the samples and mail them to our lab for expert analysis.

WATER TREATMENT BENEFITS

At Miura Canada, we take care of your boiler investment inside and out with pride.

IN-HOUSE LABORATORY

Our in-house Water Treatment Lab is located at our Mississauga office. Giving you consistent and accurate results, our water lab is furnished with the latest equipment and adheres to a Japanese quality control protocol.

RELIABILITY

Miura's Water Treatment minimizes hardness leakage using our Colormetry hardness detection to monitor the treated water.

FULL SYSTEM COMMUNICATION

Water Treatment solutions are integrated into the entire steam system's advanced IoT Technology.

ECO-FRIENDLY

Miura's BOILERMATE water chemicals are made from naturally occurring minerals that protect once-through boilers from scale and corrosion without using chemicals that are harmful to the environment.

TOTAL STEAM SOLUTIONS

Miura can provide everything your steam boiler needs to perform at optimal efficiency. Your boiler is backed by the best water treatment designed to deliver reliable, efficient, and quality steam.

MADE IN ONTARIO

Our Boilermate chemicals are mixed locally in our Brantford facility. For quicker delivery and a consistent, quality product.

Choose your Miura Maintenance Program (MMP)

WHY CHOOSING THE MIURA MAINTENANCE PROGRAM IS THE RIGHT CHOICE

Critical equipment breakdowns always happen at the worst time. Boiler equipment, controls, and accessories are some of the most vital assets in your facility. Sudden failure could mean delayed production and reduced revenue. When it happens, Miura Canada is ready with expert service and support – a partner that responds promptly with experienced, safety-minded technicians who return facilities to normal operating conditions.

- We are Miura Specialists – Take advantage of our trained technicians who are experienced and specialize in our equipment.
- We have boiler parts readily available 24/7
- We have 24/7, 365 On-call service
- Our Miura experts have special access to our Boiler CPU and check boiler history and trends

When you work with Miura Canada, you can have peace of mind knowing that when these situations do occur, you'll have fast and easy access to expert repair services and support.
