Teri Dickinson
Manager, Regulatory Affairs
Dell Tech Laboratories Ltd.
tdickinson@delltech.com

Dear Ms. Dickinson,

RE: Boilermate 2100D

This is in reference to your e-mail of May 26, 2020, wherein you submitted the revised formulation on the subject product for use as a boiler water additive in food processing establishments on behalf of Miura Canada Co., Ltd.

Based on the information submitted, we can advise that we see no reason to object to the composition and use of the subject product in boiler water systems where the steam produced may come in contact with food in food processing establishments, provided that:

- a) it is used in the minimum amount required to achieve its intended technical effect under good manufacturing practice (GMP) conditions and used only as directed by the company's representative; and
- b) the amount of steam in contact with food does not exceed that required to produce the intended effect in or upon the food.

We trust that the foregoing will be of use to you.

Yours truly,

25/09/2020

X
